Question 1:

Pull an image from docker hub and run it on docker playground.

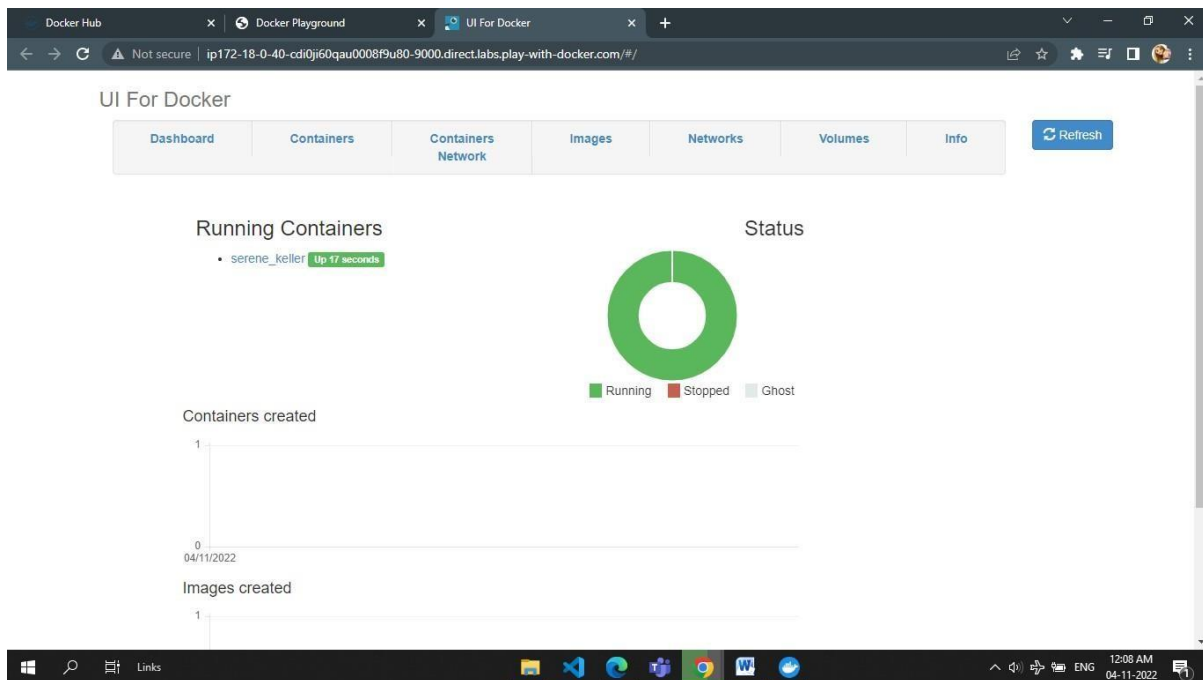

Solution 1:

`docker pull uifd/ui-for-docker`

`docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker`

The screenshot shows the Docker Playground interface in a web browser. The browser tabs include 'Docker Hub' and 'Docker Playground'. The address bar shows the URL: `labs.play-with-docker.com/p/cdi0ji60qau0008f9u80#cdi0ji60_cdi0jpe0qau0008f9u8g`. The interface has a sidebar on the left with a timer '03:57:05', a 'CLOSE SESSION' button, and an 'Instances' section with a '+ ADD NEW INSTANCE' button. The main area displays details for a container named 'cdi0ji60_cdi0jpe0qau0008f9u8g'. It shows the IP '192.168.0.13', an 'OPEN PORT' button set to '9000', memory usage '1.59% (63.77MiB / 3.906GiB)', and CPU usage '0.45%'. There is an 'SSH' section with a terminal icon and a 'DELETE' button. Below the details is a terminal window with the following output:

```
